

# Aldara Candidate Space Customization

## Aldara Hospital and Medical Center: A World-class Health Care Facility

Aldara Hospital and Medical Center is Riyadh's most technically advanced multi-specialty hospital and outpatient facility under construction phase. It will offer high-quality care at local reimbursement rates and create an integrated health system in the region.

New technologies and advances in medical working practices mean most treatments for acute illnesses & preventive health care can be performed on an outpatient basis.

# Greeno & Aldara

Greeno is uniquely positioned & possess extensive skills and experienced in implementing and supporting Infor ERP Systems to large customers across Africa and Middle East.

Greeno was chosen by Aldara as Infor ERP Services provider to optimize system configuration and personalize system for Aldara specific needs.

## Re Engineering Aldara's Candidate Space

The ability to promote and hire the right talent can significantly impact your organization's success. Aldara wanted to brand their Candidate Space in line with the website branding standards and extend it as their own career page on their corporate website.

## Requirements

Follow AHMC's corporate branding and color themes

Additional Fields to manage KSA Specific Employment Rules

Provide flexibility to the Hiring managers to Establish a questionnaire that can be filled by the candidates on line

Support Arabic translations etc.

## Challenges

Aldara's Standard Welcome Page

Custom fields as per KSA Employment Rules

Employment Validation Questionnaire as per KSA Employment Rules

UI Changes as per Aldara's Branding Guidelines

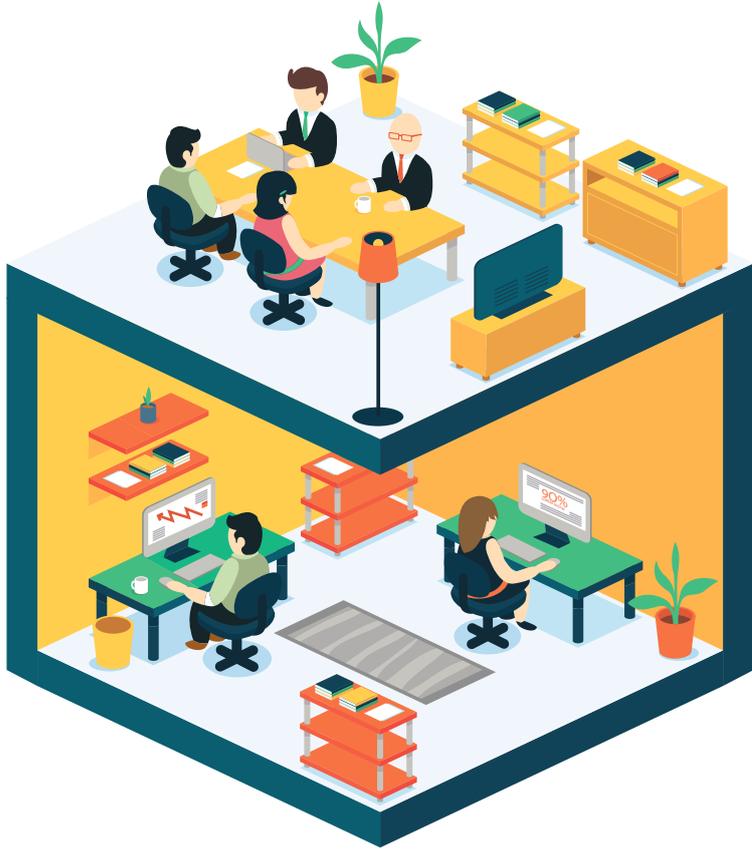

Custom Field & Text in Arabic Language

# Project Approach

Greeno was chosen by the customer to help with achieving above requirements in a timely fashion. In order to avoid data loss and corruption, the customization and Implementation process had to be managed with lots of precision, which was biggest challenge for Aldara, which was deftly handled by Greeno.

Team Greeno closely worked with customer to understand the requirements and used all latest technologies to achieve the result that made the customer delighted.

As this will be face of Aldara for all its potential recruits, entire page was tested by large group of people for functions and feel.

Also team effectively conducted the User Acceptance Testing and Data Load Testing with many number of concurrent users using Candidate Space to evaluate the performance, Greeno also helped the customer in resolving the issues during UAT and fine-tuned the Candidate Space to deliver better performance.
